

Linebot
Q480

DESCRIPTION

Elevate your show to new heights with the Linebot Q480. This unique bot, powered by twelve 40-watt RGBW LEDs, can create linear 12-pixel zooming beams of light that zoom from 3° to 54°. It offers a wide range of colors, with red, green, blue, and white color mixing, designed to spread creativity in linear lighting. The high-output LEDs can produce aerial effects or highlight performers and objects on or off stage, making your show unforgettable.

The unit offers two independent zoom sections, each with six pixels for greater control. With its wide zoom, it is ideal as a front-floor light or for scanning the crowd to engage the audience.

The motorized 210° tilt is further enhanced with the 16-bit movement for precise tilt rotation. It can be grounded or mounted using the included dual quick-release clamps. The removable side alignment guides allow multiple units to be easily connected to appear as one linear fixture.

Features

PIXEL CONTROL

The wide range of color mixing and beam effects can be enhanced with the individual pixel control of each RGBW LED.

TILT & ZOOM

With a 3° to 54° zoom range, the unit offers two zoom sections for greater control. The motorized 210° tilt is further enhanced with the 16 bit movement, for a seamless tilt rotation.

VERY BRIGHT

Equipped with 12 powerful 40-Watts RGBW LEDs to produce bright, colorful aerial effects or highlight performers and objects on or off stage.

Specifications.

Mechanical Specifications:

Power connection:	Seetronic type power in/out
Signal connection:	5 - Pin XLR in/out
Tilt movement:	210° 8/16BIT
Colors:	Red, green, blue, white
Zoom angle:	3° - 54°
Zoom control:	2 Independent zoom sections
Strobe:	Electronic strobe effect with variable speed
Fastening system:	2 Mounting points

Control systems:

Control protocols:	DMX 512 Pre-programmed macros & chase effects at variable speeds
RDM:	No
DMX Channels:	2 modos of operation Mode 1: 15 channel mode Mode 2: 63 channel mode
Display:	LCD Display

Electrical Specifications:

Light source:	12 X 40W RGBW LEDs
Color temperature:	6958K
CRI (warm white):	70.9
Lumen output:	2459 lm
Power supply:	Universal 100-240V 50/60 Hz
Power consumption:	590 Watts 5.04 Amps

Size and Weight:

Fixture size:	40.15" X 5.12" X 11.75"
Fixture weight:	38.3 lb
Packaged size:	41.5" X 7.25" X 13.5"
Packaged weight:	39.5 lb
