COLOR PICK
LED PAR 0190

COLOR PICK
Q190

DESCRIPTION

The Red, Green, Blue, Warm White Color Pick LED Par Q190 is a color-changing par fixture with nineteen 10W LEDs. With a 25° fixture lens, it can produce smooth, wide-wash color combinations. The four segments of control allow users to create different individual or grouped effects, including individual control of the center, second circle, and two outer circle groups, creating eye-catching patterns. The pre-programmed scenes provide flexibility for stand-alone operations and eye-catching effects.

The warm white LED makes it ideal for lighting up facial tones with an average 3000k color temperature. Equipped with a double-mounting yoke, the unit can be rigged using a clamp or grounded for versatility.

This value-priced unit is ideal for schools, small production companies, venues or DJs

Features

COLORFUL

Featuring red, green, blue, and warm white color mixing, it can create numerous color combinations.

NINETEEN LEDS

This unit features a total of nineteen 10W R, G, B, WW LEDs that can be used to create individual or grouped effects.

SEGMENT CONTROL

The 4 segments of control allow users to create different individual or grouped effects, including individual control of the center, second circle, and two outer circle groups, creating eye-catching patterns.
